

Audi A1

Corning Light

Illuminating the kerb when turning hard left or right at low speeds with dipped beam on, by turning on the front fog light on the relevant side of the car.

Passenger Mirror dip when in reverse

When reverse gear is selected, the passenger door mirror dips to show the kerb if the mirror control knob is set to the passenger door mirror position. When driving forwards and exceeding 5mph or when switching off the car, the passenger mirror returns to its original position. If the position of the mirror is changed when dipped, this change is remembered the next time the mirror dips.

Beep on Lock

Chirp the alarm siren briefly when the alarm activates (ie all doors are closed and the car
